

FY07 Environmental Quality Incentives Program (EQIP) Comprehensive Nutrient Management Plan (CNMP) Payment Schedule - SWINE

Summary for F07EQIP CNMP Initiative													
Base Farm number of animals	< 2,000	2,000 to 3,000	> 3,000										
	Swine	Swine	Swine										
NEW Plan/ Operation/ Expansion for 50% animal numbers													
Animal Unit CNMP	\$3,100	\$3,870	\$5,030										
Acre CNMP	\$4,560	\$5,690	\$7,400										
Acre CNMP - Export	\$2,280	\$2,845	\$3,700										
Definitions													
New Plan:	A CNMP for an operation that did not previously have a CNMP.												
New Operation:	A newly constructed livestock operation with a waste management system.												
Existing operation with 50% expansion:	A livestock operation with a CNMP that increases by 50% or more of the original animal numbers addressed by the existing CNMP.												
Animal Unit CNMP:	The planning activities for the manure and waste handling components of the system. This will be engineering related information.												
Acre CNMP:	The planning activities for the land treatment practices and nutrient management aspects of the system.												
Acre CNMP - Export:	A livestock operation that exports 50% or more of the manure or organic products (including mortalities).												
Export:	Manure or organic material that is transferred to another owner with documentation in written record of transfer.												
Base Farm number of animals	< 2,000	2,000 to 3,000	> 3,000										
	Swine	Swine	Swine										
Existing Plan Revision for operations that have a plan that is revised. Includes expansion up to 50% of animal numbers													
Animal Unit CNMP	\$2,170	\$2,710	\$3,520										
Acre CNMP	\$3,190	\$3,990	\$5,180										
Acre CNMP - Export	\$1,595	\$1,995	\$2,590										
Definitions													
Existing operation with less than 50% expansion:	A livestock operation with a CNMP that increases by less than 50% of the original animal numbers addressed by the existing CNMP.												
Existing Plan Revision:	A livestock operation with a CNMP that needs to be revised due to changes in the operation not addressed by the existing CNMP.												
Animal Unit CNMP:	The planning activities for the manure and waste handling components of the system. This will be engineering related information.												
Acre CNMP:	The planning activities for the land treatment practices and nutrient management aspects of the system.												
Acre CNMP - Export:	A livestock operation that exports 50% or more of the manure or organic products (including mortalities).												
Export:	Manure or organic material that is transferred to another owner with documentation in written record of transfer.												
Instructions for Use													
The activities associated with the development of a CNMP have been divided into 2 categories													
Animal Unit CNMP and Acres CNMP (Export CNMP is an option for Acres). The Total Plan includes both categories.													
Step 1: Locate the Base Farm number of animals that reflects the species and number of animals for the waste management system.													
Step 2: Follow column to row that corresponds to proper category. Can not include both Acre CNMP and Acre CNMP - Export.													
Step 3: Select maximum payment for plan. A total plan may be the sum of the Animal Unit CNMP and Acre CNMP payments. Export CNMP is an option instead of Acre CNMP.
